## Customer Reviews

[In the interest of full disclosure, I too received a complimentary advanced draft copy to read] Unless you have some big fancy economics or MBA degrees behind your name, I believe even those of you physicians or readers who consider yourselves financially literate will benefit from the primer's

many insights. Enlivened with personal stories and anecdotes, the book's journey starts by challenging the reader to know where you are, and know where you want to go, by reflecting upon and developing a 10-, then a 3- and finally a 1-year vision, both for life and for business. The next challenge Denniston insists we consider is implementation! How to achieve the vision ... This is where disciplined planning become critical. Just as having the right mindset is essential. The author addresses both of those in some detail. Subsequent chapters focus on helping the reader become educated and financially literate. There are chapters about debt (how to get out of it, or at least get it under control), understanding and minimizing taxes and capital gains, and developing investing strategies. And since this book was published in February 2015, the content appears to be updated and timely. Instead of pontificating and engaging in political rants, Denniston calmly discusses the implications of updated laws and regulations and how we in the medical community should adapt our financial strategies and tactics. The book offers tools, tables, examples, detailed chapter summaries (for those who like to cut to the chase - although you'd be gnawing on bone instead of enjoying something meatier!) and lists of online and offline resources.
